GOAL

An eternal thirsty of software development as one of the most exciting things in my life. I love teamwork, learning from others and sharing my knowledge. I also love solving problems and being part of a great team.

WORK EXPERIENCE

Ludei Inc

2013–Present   Software Engineer, LUDEI INC — Bilbao

Ludei is one of the best (Spanish/International) companies in HTML5 apps and games development. We have developed CocoonJS and a cloud compilation platform that works with our core (CocoonJS) and other solutions like Cordova. Ludei also develops a huge range of well known games for mobile markets. My role at Ludei is mainly the backend infraestructure development and the cloud compiling system, using technologies like AWS services, Docker, Jboss, etc. I design and implement this infraestructure in a multidisplinar working atmosphere with the rest of the team.

Media for Future

2011–2013   Software Engineer, MEDIA FOR FUTURE — Bilbao

Media for Future is a consulting company that works for the public Basque television (EITB) and for the Basque Gorverment in Spain. I worked there as a software engineer doing the technical analysis and implementation of the following projects:

- A web application, using Google App Engine, to search academic courses in our geographical area. The core of the application is based on a Google Search Appliance (GSA) that indexes our imported courses from many feed providers.

- A research project as part of a plublic program for disabled children consisting on a touch screen with a client application to select their favourite educational games and play with them. The backend was written in Python, using Django, and a client interface for touch screens was developed with PyQT.

SIC S.A

2009-2011   Software Developer, SIC S.A — Bilbao

SIC is a software consulting company that mainly works for the Goverment. I worked there for some Basque Goverment projects, using Weblogic as J2EE server and some governamental libraries like Geremua, that is basically a web framework based on Struts. I also leadered a project for the Basque Goverment consisting in a web application for courses management used by public employees.

Sycaton

2008-2009   Software Developer, SYCATON (VERSIA) — Bilbao

Sycaton offers mainly consulting services for third party companies. There, I worked as software developer in two important projects for Eroski (a state wide supermarket chain) using J2EE5 technology. The first project was a web application to process and visualize the average time in the waiting queues,

and the second one was a backend tool for managing and distributing the firmware of some wirless devices used to check and update product prices.

EDUCATION

2003-2008   Univertsity of the Basque Country (EHU), Bilbao

Telecomunications Engenieer, 1st degree   Speciality in computer networks

PROGRAMMING LANGUAGES

Java   Currently this is my main programming language. I've been developing with it for the last six years, using a wide range of technologies like Jersey, Hibernate, Spring, Playframework, etc. I've also used some core technologies of the J2EE specification in a JBoss and Weblogic environments.

Python   I learnt python basics on my own some years ago and I used it in a public research project in the past using Django as web framework and pyQT library for the client side. Nowadays I continue using it in my personal projects.

Javascript   I've used this language for small personal projects in the frontend and the backend. In the frontend I've worked with frameworks like Backbone.js and in the backend with node.js, and Express as a web framework, among some other libraries. I've also developed some scripts, with coffeescript, for the Github's Hubot, and both were published in the npm repository.
hubot-memegen — hubot-sensors

COMPUTER SKILLS

Testing Frameworks   JUNIT, SELENIUM

Relational Databases   MYSQL, POSTGRES

NoSQL Databases   REDIS

OS   ARCH LINUX, DEBIAN

Editors   EMACS, INTELLIJ

Amazon Services   S3, ELASTIC BEANSTALK, CLOUDFRONT, RDS

Other   MAVEN, GRADLE, DOCKER

ADDITIONAL INFORMATION

Languages   ENGLISH · Good working knowledge and medium level in conversation (FCE certificate in 2012)

SPANISH · Mothertongue

Interests   Continuos learning · New technologies · Cooking · Running · Music
